Come celebrate Global Divestment Day with the Student Christian Movement and Divest York from a faith and justice perspective!

Consensus Scientific studies conclude that over 80% of the fossil fuel reserves must be left in the ground, and not burned, if we are to stay under 2 degrees celsius of global warming. Divestment is one tool to remove the social license for extracting and burning fossil fuels and the resulting CO2 pollution of the atmosphere and the oceans. As fossil fuel reserves become unburnable (stranded) in the medium term, divestment is also an important fiduciary (faithful) decision.

Join us as we welcome Professor Walter Whiteley to host our discussion.

Professor Walter Whiteley, Department of Mathematics and Statistics
Member of the Graduate Programs in Mathematics, in Education, in Computer Science
Former member: Board of Trustees, York University Pension Fund
Member of Divest York working group, Climate Justice Group, the Advisory Board of York University Student Christian Movement
